

All eligible genes

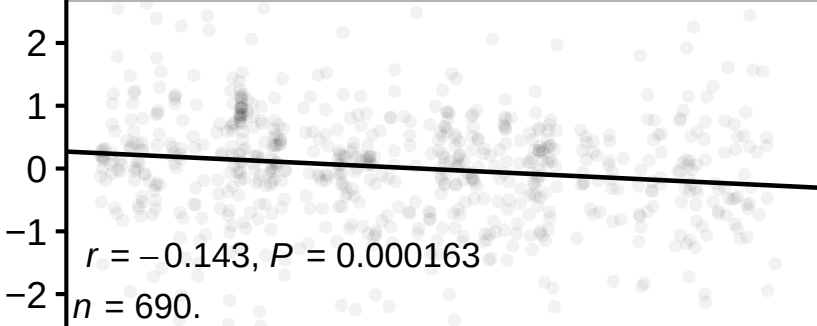

Points are genes; black lines are descriptive ordinary least-squares fits

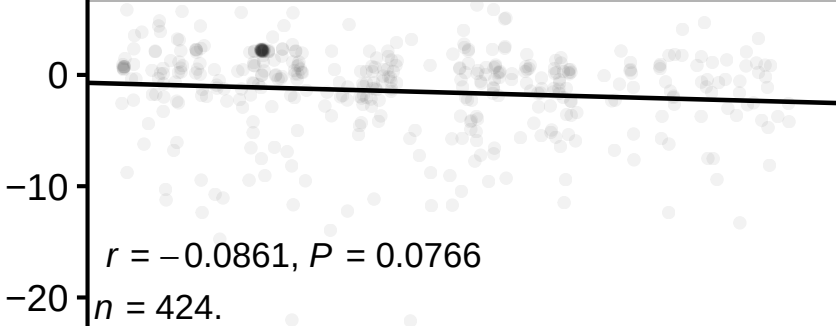

PanKB core

Points are genes; black lines are descriptive ordinary least-squares fits

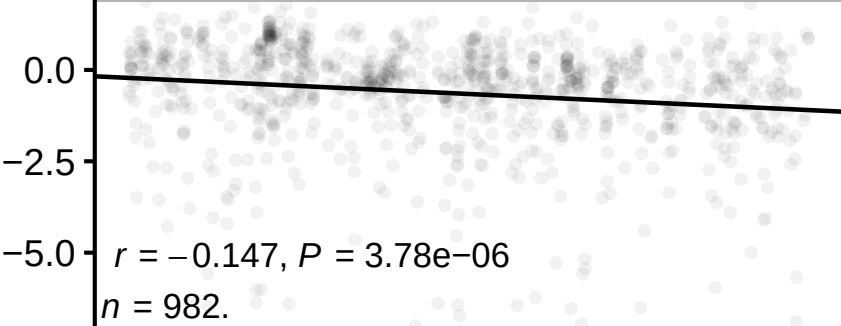

Schmidt dataset

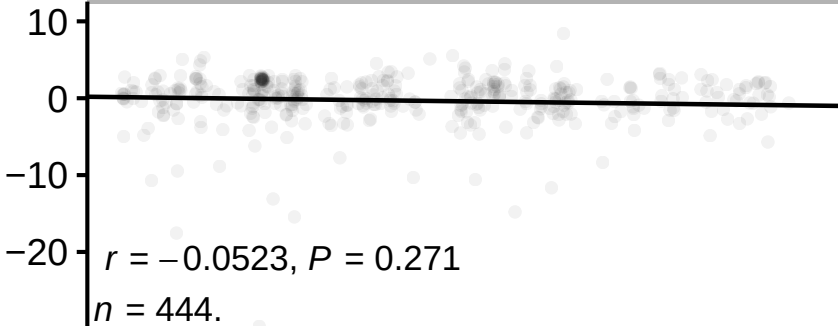

Peebo dataset

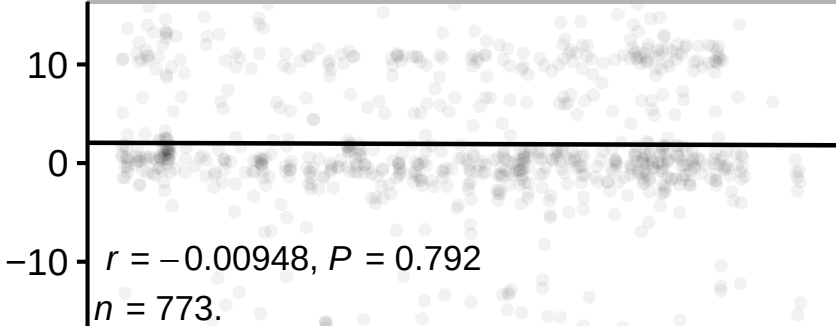

Li dataset

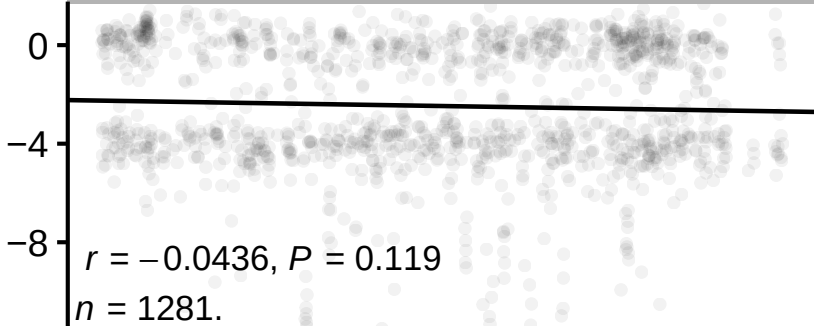

Valgepea dataset

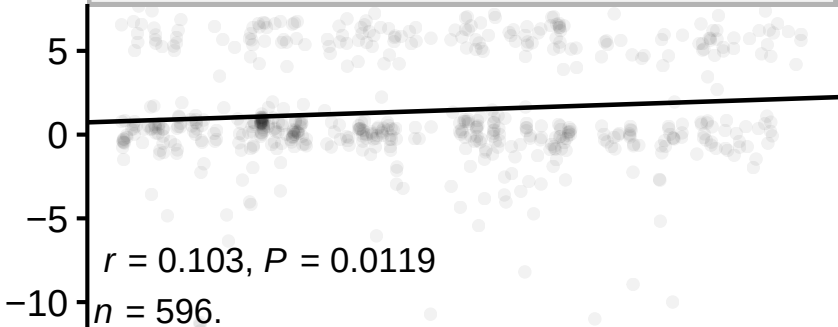

Goelzer dataset

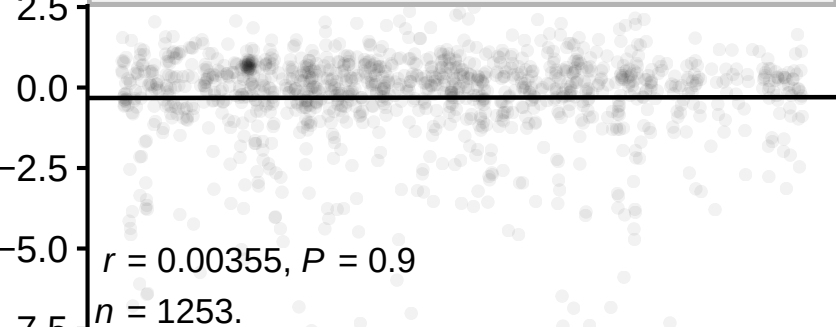

Zhu B. subtilis dataset

Zhu E. coli dataset

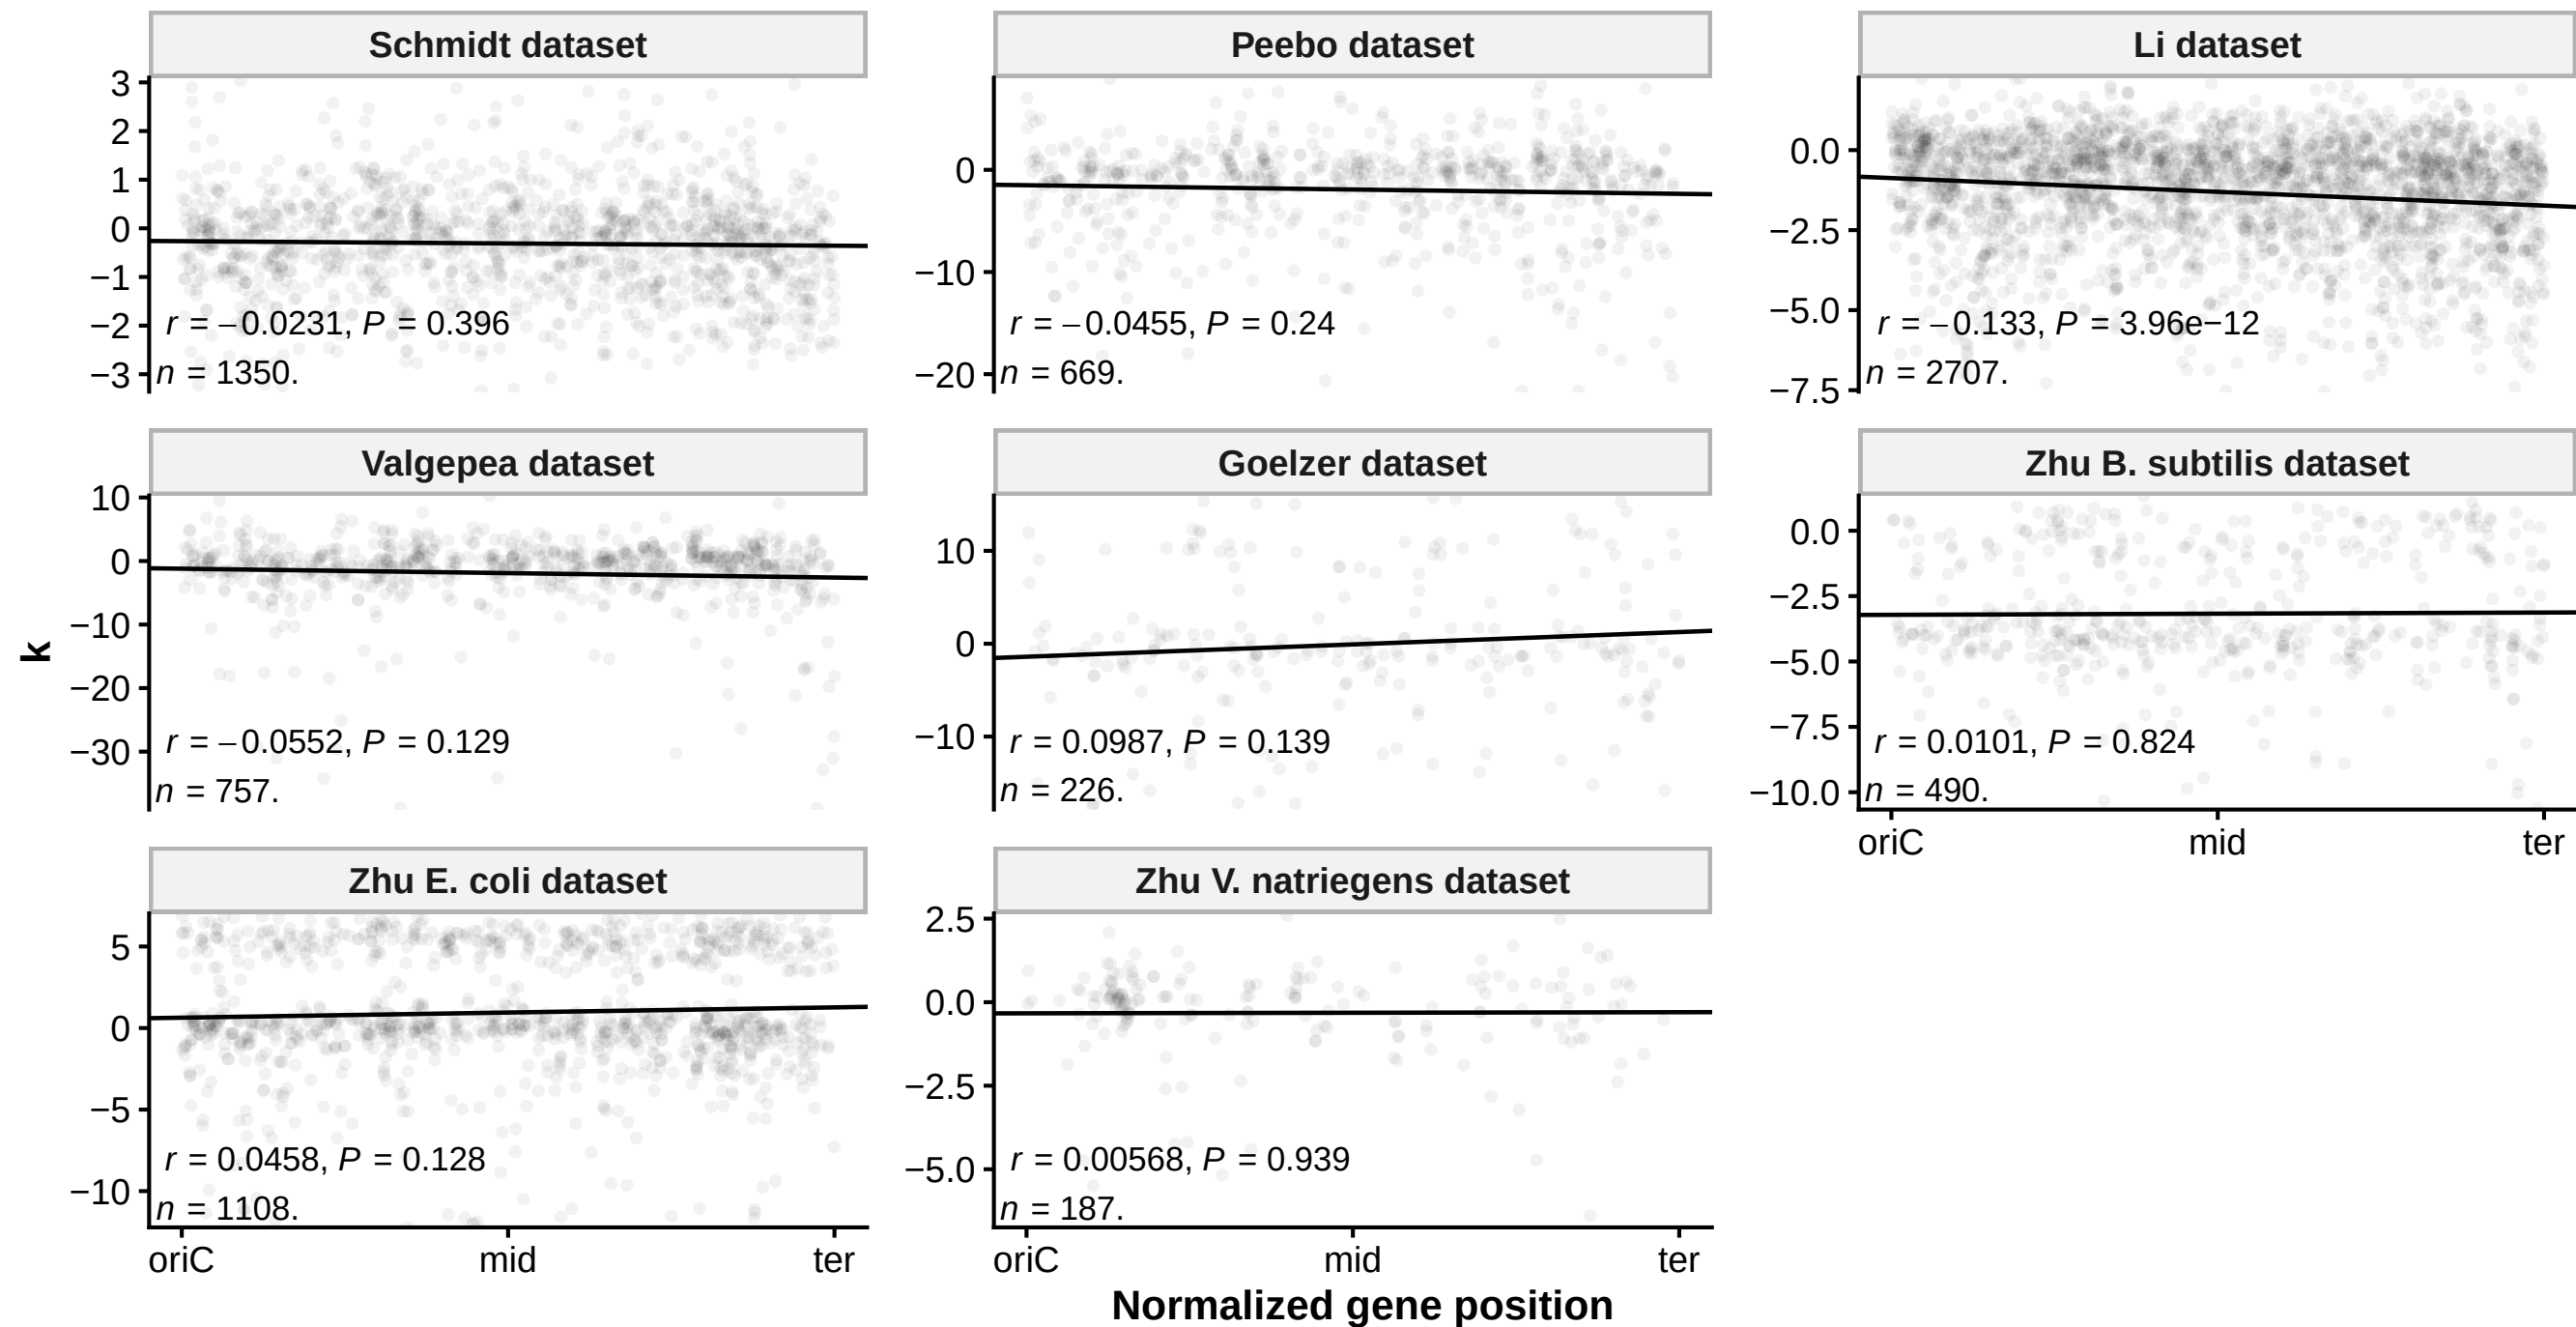

Zhu V. natriegens dataset

Normalized gene position

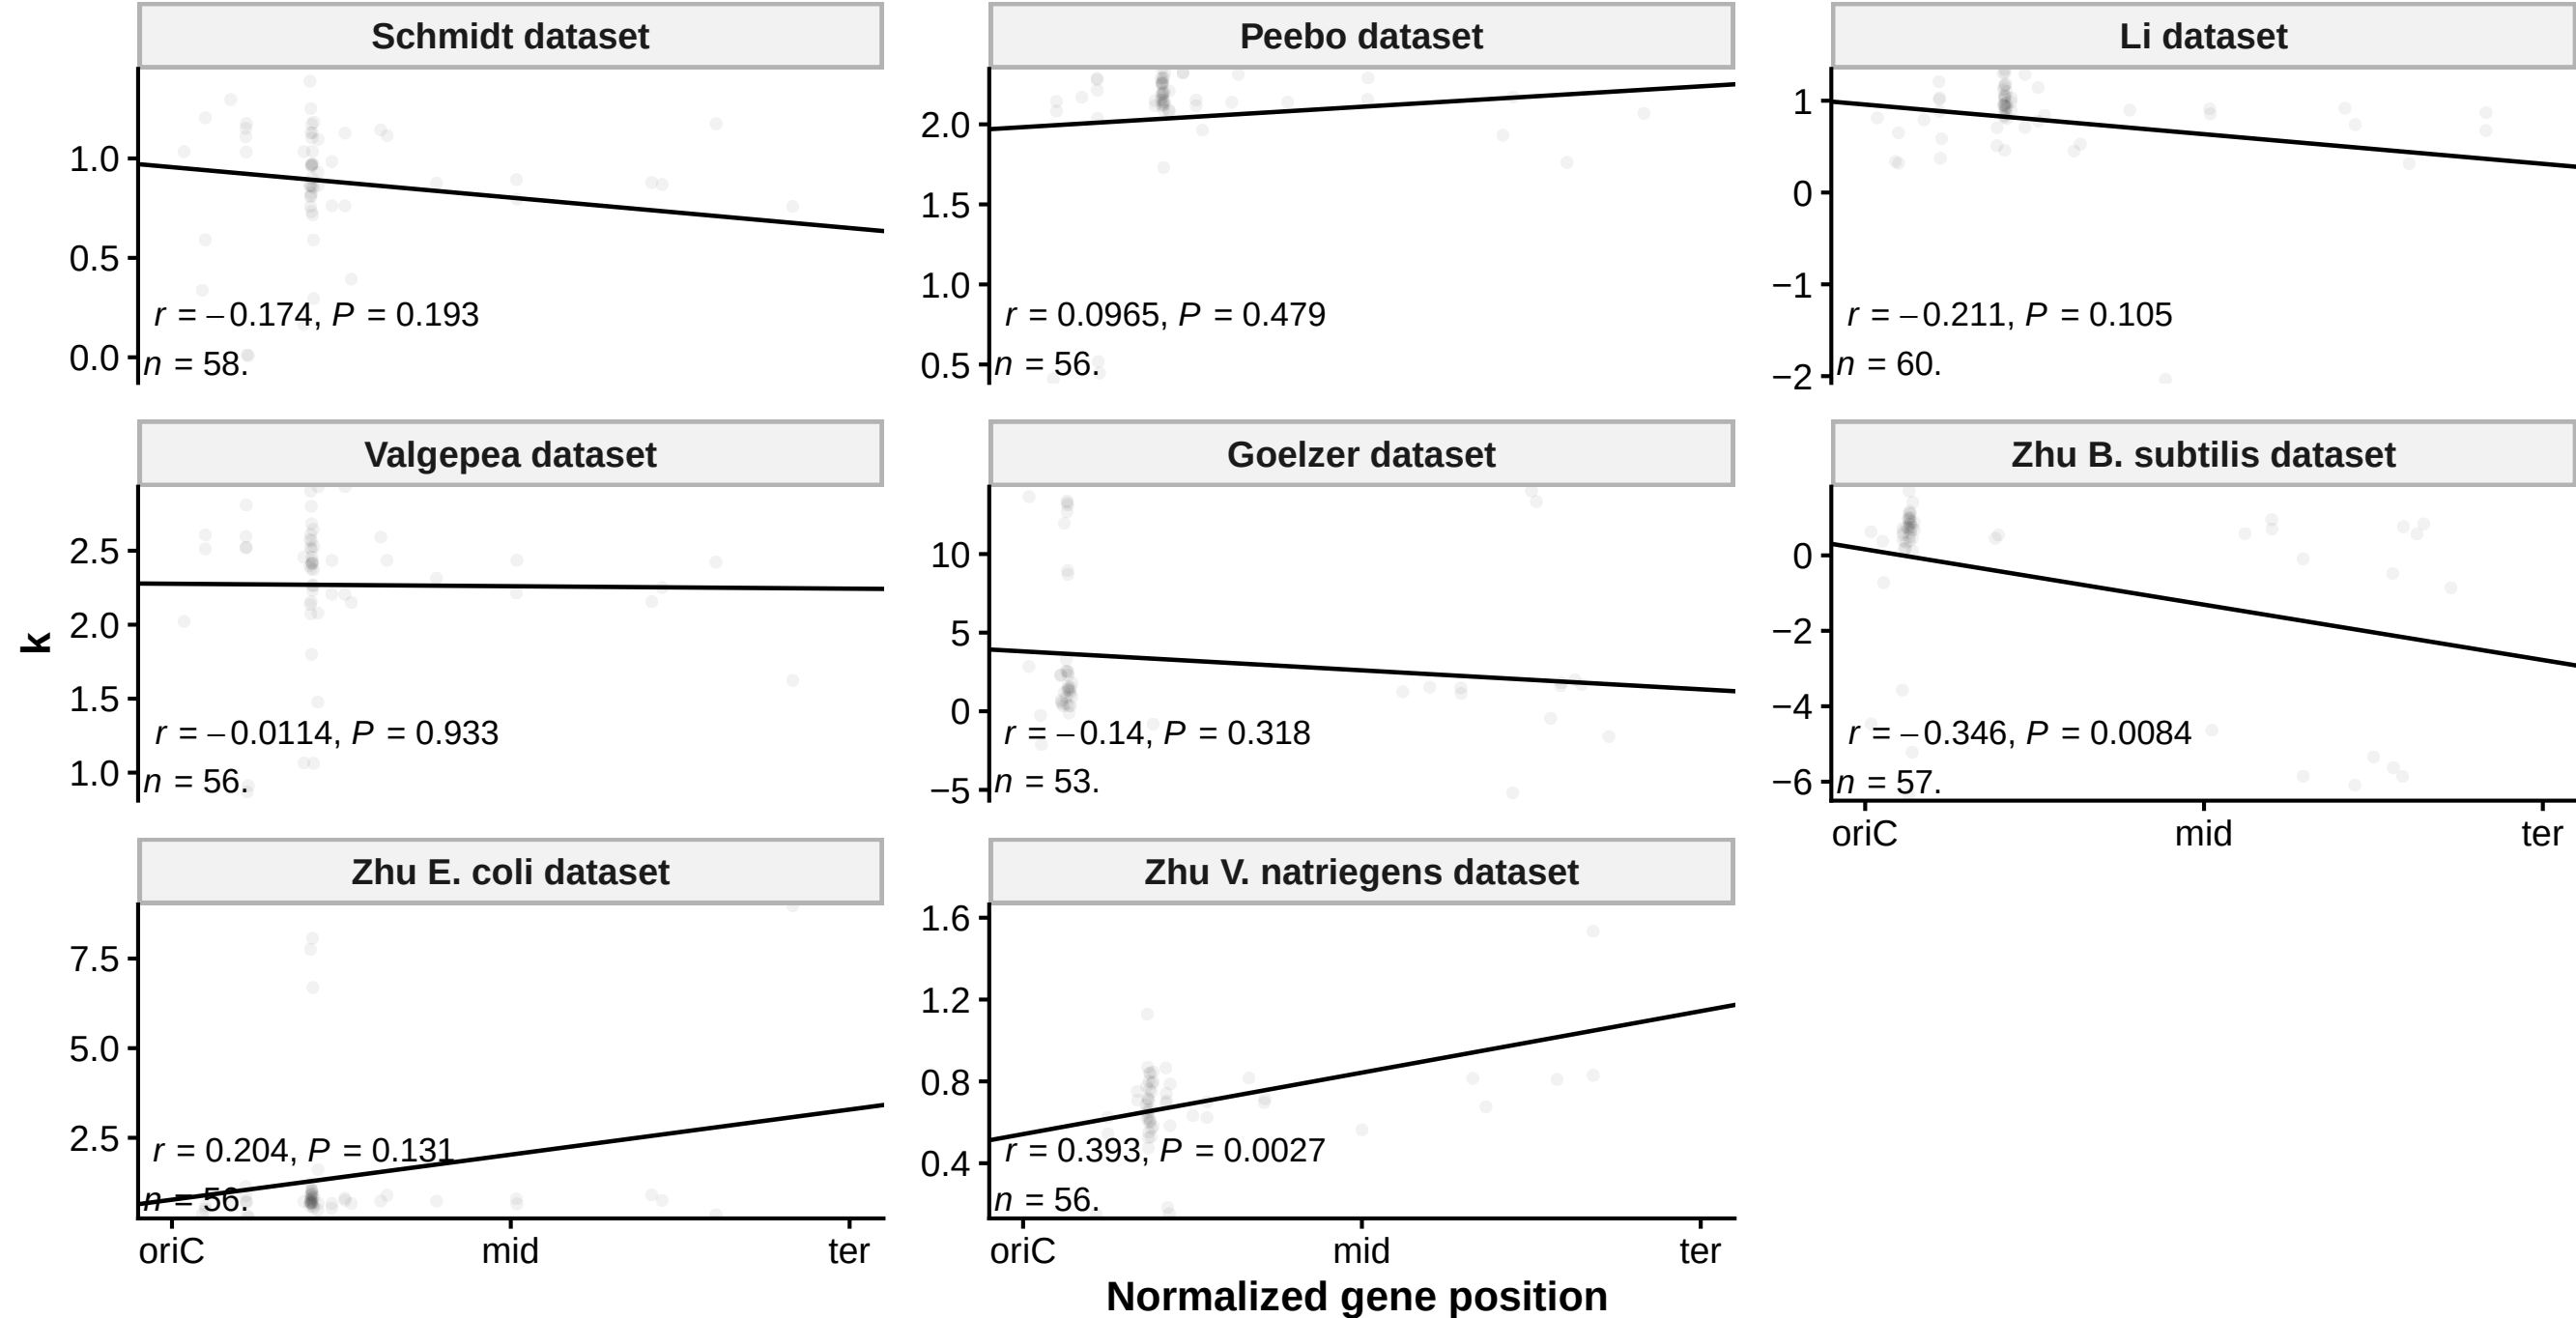

PanKB accessory (including rare)

Points are genes; black lines are descriptive ordinary least-squares fits

RNA polymerase + ribosomal protein

Points are genes; black lines are descriptive ordinary least-squares fits

Other genes

Points are genes; black lines are descriptive ordinary least-squares fits
